

GUIDELINES FOR PREPARING POSTER PRESENTATIONS FOR THE NDT SYMPOISUM

Each poster presenter will have a "booth" space in a large meeting room. Each space contains a **4- by 8-foot (120 cm by 180 cm)** poster board. A poster presentation should include a title, presenter's name and address, an abstract, key points, conclusions, charts, and tables or diagrams. During this session, attendees browse among the presentations and speak directly with presenters. The poster session is informal, conversational, and highly conducive to the interchange of information between audience and presenter. It's recommended that each poster presenter also bring some copies of a small version of the poster to the booth for distribution.

6 ft (180 cm)

4 ft (120 cm)
